

Yieldin is a young and innovative company\* that provides consulting services in Revenue Management, designs and delivers price oriented decision support solutions.

Yieldin solutions are logical enough to be understood by everyone, but also flexible enough to adapt to fast moving environment and strategies:

- Our expertise in various sectors applicable to RM brought us to the conclusion that if RM still needs to rely on solid math algorithms, RM systems can't be black boxes anymore, they have to be understood by everyone, from RM Analysts, to Commercial and Top Managers.
- Our systems take decisions according to both internal and external factors. Not only they are reactive enough to adapt themselves to any change on the market place, but also they are flexible enough to fast take into consideration some top management strategic decisions.

Together with our clients we bring the focus on the yield, profitability based on revenue.

\* Yieldin is recognized by the French Research Ministry as JEI, Young Innovative Company.
